### DETAILED ACTION

This application is a response to applicants' application filed January 16, 2001.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gilson et al (US Patent 6,336,934) in view of Daniel et al (US Patent 6,001,118). See figures 20-21 of Gilson et al. The patent to Daniel et al discloses a hoop member eccentrically connected to the elongate member. The patent to Gilson et al is silent as to the hoop at 60 is eccentrically displaced when the hoop is collapsed. However, it would have been obvious to collapse the hoop member by sliding the hoop along the guide wire. This movement would essentially cause the hoop to move eccentrically along the elongate axis. Also see figure 11 of Gilson wherein the suspension members are moved along the axis of the elongate member. In regards to claim 5, see column 3, line 49 – column 4, line 24 of Gilson. Concerning claim 8, any portion of the hoop that bends as a result of closing the hoop is considered an articulation region. Concerning claim 14 and related claims the patent to Daniel suggests the use of a tube at the distal end of the blood permeable sac. In regards to claim 20, the manner in which the pores are made has no limiting effect on the apparatus claim in this instance.

Concerning, the depending claims not specifically referred to above are well known in the method steps and devices in embolic filter art. The art of record teach each of the limitations recited in claims 1-40.
